

The original & the best...

Vetbed® provides advanced support and thermal retention properties for all animals. Exceptional bedding for dogs and cats that maintains its strength and durability while retaining a soft, luxurious, and dry, cozy feel. Vetbed® the Original green backed fleece pet bedding, recommended by vets and preferred by breeders.

- Hygienic, non-allergenic & nontoxic.
- Excellent drainage properties ensure a dry, cozy surface, always.
- Easily machine washable without deterioration over time.
- Suitable for home, travel, and professional use.
- Ideal for animals with allergies or sensitive skin.
- Available in wide range of sizes and custom printed on white with blue and yellow paw prints. Yes, the white stays white!
- The higher bulk and superb heat retention distinguishes it from all other vet fleece.

Why Choose Original Vetbed?

- The most durable vet fleece on the market, it lasts forever when cared for, even if abused, it still performs.
- Engineered to wick away moisture efficiently, keeping pets dry, always.
- Easily machine washable and dryer safe or air dry. An energy and cost-effective solution as dryer time is a fraction of the time it takes to dry cotton or cotton blend fabrics.

Washing Instructions

- Washing Vetbed® is easy.
- Wash in warm or hot water, regular cycle, normal detergent.
- Tumble dry on low heat.

Do

- There is always going to be a small percentage of loose fiber in the Vetbed from the manufacturing process. **Washing before use** is advised to remove any loose fiber to ensure none is ingested by pups by accident.
- Do wash in hot water, Vetbed® can withstand water temperatures up to 140°F.
- Do use laundry aids such a Borax® or Sudsy Ammonia® if your Vetbed is heavily soiled due to whelping or other tough stains. Use ammonia if your Vetbed smells strongly of urine.

Don't

- Chlorine Bleach will shorten the life of your Vetbed®. Vetbed® is made of 100% synthetic fibres and synthetic fibres become brittle when subjected to chlorine bleach. If you feel the need to deep clean your Vetbed® use the hottest water available and Borax® or hydrogen peroxide.
